SUPPLEMENT TO
REPORT NO.

25X1X

1. The Zagreb-Donja Stubica railroad tunnel currently under construction below Mount Sljeme will contain underground areas for military use, and separate tracks leading to them. At a recent unspecified conference, military specialists and engineers submitted plans for the construction of separate tunnels stemming from the main tunnel to underground areas for military use. At the same conference it was proposed that a small freight unloading station, which could be used by the military in event of war, be constructed inside the tunnel.
2. At present the Army is not doing any construction work inside the tunnel. In case of war, however, the tunnel would come under military jurisdiction and would be used largely as a means of protection from attack.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
